

Custom Software App Development

Obtaining the perfect app involves two phases of work:

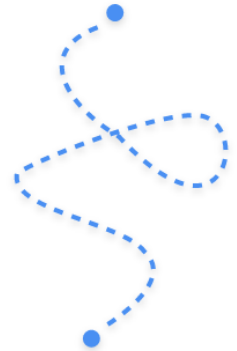

DEVELOPMENT

Making a Mockup (a virtual online document with forms, windows, buttons, etc.)

SOFTWARE DEVELOPMENT

Made entirely on the base of the Mockup.

Delivery time for the first phase lasts between one week and one month.

The delivery period for the second phase will be appreciated more objective and real after completing the Mockup

COSTS

DEVELOPMENT

The cost of making the Mockup is a fixed one

750€

SOFTWARE DEVELOPMENT

The cost for the actual development of the software app is a flexible one

X-Y€

Flexible, we will do everything we can to estimate even at the margins (from X to Y) of an achievement price. And after completing the Mockup we will be able to make a real estimate

To see all the technical specifications for the two stages, we invite you to visit our website
